MATERIALS & SWATCHES

ALUMINUM

Aluminum is a lightweight metal that is very strong and durable. The alloy we use guarantees excellent resistance to corrosion and has outstanding material properties. All aluminum products in the OASIQ collection are polished by hand, which produces a very beautiful finish when painted. After polishing, the furniture is cleaned, chemically treated, and painted using an electro-statically applied polyester powder coating. This gives the furniture a very strong finish, making it scratch resistant and weatherproof.

TEAK

Teak is a beautiful dense hardwood with a uniquely high natural oil content. This means that it easily withstands all kinds of weather conditions. Even without any form of protection, sun, rain and snow do not diminish the quality of this natural material. Our teak furniture is delivered to the customer untreated. Under the influence of weather conditions, teak furniture will slowly change colour to a silvery grey that perfectly matches its natural surroundings.

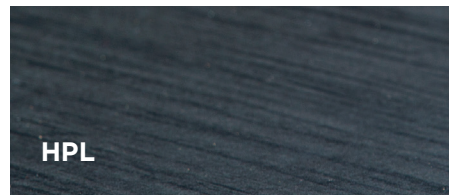

STAINLESS STEEL

All stainless steel products in the OASIQ collection are made of Grade 304 stainless steel. This metal consists of various alloy elements such as iron, nickel and chromium. When exposed to air, a hard chromium-oxide layer is formed that protects the metal against corrosion. Our stainless steel products have been hand brushed to give their surface a satin-like shine that feels very smooth. The result is a corrosion resistant surface that is easy to clean and maintain.

ROPE

All rope used in OASIQ woven furniture is manufactured from a combination of high performance Textilene® and solution-dyed Diversatex™ Olefin outdoor yarns. This rope is tough and durable, yet soft and supple. As the yarns are dyed all the way through and have excellent UV-resistant properties, these ropes will remain colourfast for many years and will withstand the rigours of outdoor use with style and elegance.

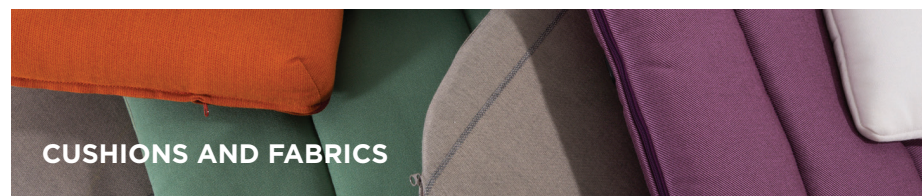

HPL

HPL (high pressure laminate) is a flat panel, based on thermosetting resins and wood-based fibres. These panels are manufactured under high pressure and at high temperatures. This process ensures that the resins in the core layers of the panel and on the surface bind with each other. The result is a homogenous panel of high density, which is very strong, durable and weatherproof.

CERAMIC

OASIQ ceramic slabs are produced with an innovative technology, by compacting the material and then firing it in an electric kiln at temperatures over approx. 1220°C, suitably designed to ensure the product evenness. The slabs manufactured in this way are perfectly flat and can later be cut or trimmed with total size accuracy. The ceramic slab is highly scratch and abrasion resistant. It is frost resistant and suitable for all weather conditions.

CUSHIONS AND FABRICS

OASIQ cushions are covered with Sunbrella fabrics. These fabrics have been especially developed for outdoor use and are made of solution-dyed yarns. This unique colouring process guarantees optimal UV-resistance and durability. Most of the covers can be removed for cleaning. The fabrics have also been treated with a water-repellent Teflon layer.

The inner cushions are made of a special weatherproof foam called QuickDry Foam. This is a cutting-edge, high-performance foam designed specifically for outdoor cushions. Manufactured from carefully selected high-grade material, QuickDry has extreme durability and strength. Its unique porous open-cell structure allows water to drain very rapidly and fresh air to circulate freely and continuously. OASIQ cushions are perfect for all year use.

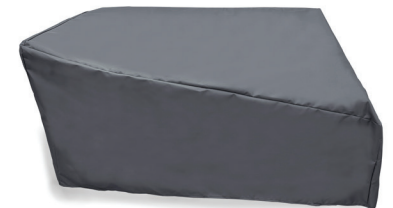

ALL-WEATHER WICKER

All-weather wicker is used in our Astor collection and it consists of a material called Polypeel. It is a synthetic, tensile-strength polyethylene fiber. It is 100% recyclable, non-toxic, highly durable and insensitive to UV rays, temperature fluctuations and harsh weather conditions. The best part is, the material is resistant against rain, salt water and chlorine, so it's safe to be used at the beach and swimming pool side.

FURNITURE COVER FABRIC

Sur Last® is a 100% solution dyed polyester fabric designed to be flexible and easy for manufacturers to use. Its urethane coating enhances the stability of the weave and allows for greater water resistance, while also minimizing shrinkage and stretching. Sur Last features a high UV, water and mold and mildew resistance and has excellent tear and abrasion resistance. It is also non-abrasive to gel coat and other popular marine finishes and offers outstanding silkscreen adhesion. Sur Last does not require a hot knife or serging during fabrication and resists unraveling. As with most coated products, for best results, the non-coated face of the fabric should be exposed to the sun. Sur Last® by Glen Raven, Inc. is also the maker of Sunbrella®

PRICING & LEAD TIMES

Prices are F.O.B. New York City or North Carolina. Prices are listed in US dollars and are subject to change without notice. Net pricing is available only to qualified members of the trade. We strive to keep items in stock as much as possible, in order to quickly ship all orders. Stock availability and /or production lead times change daily for each product -- please contact an OASIQ representative for up-to-date lead time before placing an order. Verbal or written stock checks, quotes or freight quotes do not constitute a "hold" on said items. Items are only held by a specified written hold confirmation issued by OASIQ or by a 50% deposit made by the client. The Lead time would be 8 to 16 weeks when the item is not stocked in our USA warehouse.

GENERAL SALES TERMS, RETURN & WARRANTY POLICIES

A deposit of 50% of the total balance due is required to initiate any order (which includes cushion manufacturing, beginning production on special order items, etc.) Returns are only accepted via arrangement with OASIQ and are subject to a 30% restocking fee. Full balance is due prior to items being shipped from our warehouse. Goods remain the property of OASIQ until paid for in full.

OASIQ's warranty policy for our teak, stainless steel, woven materials and aluminum frames is three years and one year for our cushions and fabric. Warranties are valid only from the receipt date of the original order. The warranty policy covers manufacture defects with normal usage. The warranty for the powder coating is two years and covers peeling, blistering or cracking. This warranty does not apply to damage resulting from improper maintenance, misuse, negligence, or normal wear. In all cases, warranties apply only to the original owner during normal residential use. Contract / commercial warranties are 1 year for all materials.

Teak is a naturally oily wood and in some instances may stain the cushions that OASIQ will not be held responsible for. Fine cracks in teak are normal occurrences that are non-structural and do not yield the product defective. OASIQ is not responsible for maintenance performed on any piece of furniture except otherwise done by OASIQ. All claims must be submitted with a photograph and repair and/or replacement will be at our discretion. All of our furniture is made to order and is subject to a 30% restocking fee for all returns. Please note that all custom orders are final sale and will not be accepted as a return. If an order is cancelled after the deposit is received, please note the deposit is non-refundable for custom orders.

For Stainless steel frame furniture that is used directly on the coast. A weekly cleaning is required and it is advisable to often use a sponge and mild soap, such as natural liquid dish detergent, to more thoroughly clean off any deposits. We do not offer a residential warranty against rust for frames used in this environment. Never use industrial pressure washers, abrasive products, or cleaners with bleach or chlorine when cleaning any type of stainless steel.

SHIPPING

We contact a variety of freight companies to bid on each individual order, for the best and most cost effective method to ship the goods. If desired, clients may arrange their own pickup and delivery. A pick up inspection in OASIQ facility by the client's contract shipper is required. OASIQ is not responsible for any damage that occurs during transportation after goods leave OASIQ's facility when the transportation is not arranged by OASIQ. Orders left unshipped after 30 days will incur storage fees of 5% of invoice value per month. An estimated ship date is stated on each order, but an actual ship date can only be confirmed within a few days of shipment. If circumstances beyond our control will significantly change the estimated ship date, OASIQ will inform the client of the situation as soon as it is possible. Ship dates are also dependent on receipt of the full balance due, availability of transport companies to pick up the order, completion date of furniture/cushions, receipt date of COM, and accurate shipping information. Any delay in the estimated delivery date shall not constitute a right to refuse the goods. All shipments are insured and shipped at the client's risk.

Client must inspect goods when they arrive. In the case of damage, document in detail all damage on the packing slip -- both driver and client must sign off the packing slip -- and the client should keep one copy. Photographs are required. OASIQ must be informed of any damage at the same day of the delivery in order to file a claim. Provided with documentation, we will be happy to handle any transportation damage claim for our clients for shipping which was originally arranged by our office. Once your furniture first arrives, we recommend before first use that you first brush off any wood particles or dust using a duster or a damp cloth. Keep cushions off teak furniture when not in use for first three months for preventative care.

All fabric yardage shown on this page is for solid color only. For Stripe, Print or pattern that required special repeat, please provide us the fabric brand, item number and an image of the fabric for quoting. OASIQ will do our best to estimate the precise fabric yardage needed for each product, but we reserves the right to request more fabric than yardage shown on this page in some unavoidable yardage shortage situation during the production.
